January 2010 £3.50

## Test Yourself

We're lead-free – are you?

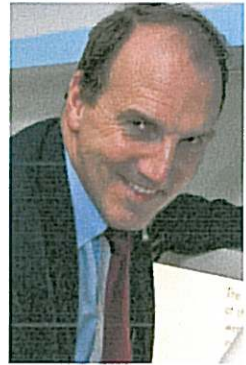

Most of the window and door systems in the UK contain lead. However, Kömmerling and KBE have been lead-free for 5 years, thanks to our proven Greenline compound. Legislation has helped eliminate lead in many consumer products and now as an industry we're committed to eliminating lead from PVCu profiles by 2015.

To back this up we've now launched the UK's first PVCu lead-free test kit. Use our products and it's an opportunity to show your customers that you are lead-free and for you to become a greener and better business.

Take the lead-free challenge today and find out how green you really are.
